

## Oracle Apex Developer

### Job description:

EpiVax seeks an Oracle Apex Developer skilled in the delivery and ongoing support of Oracle Apex Applications. The Immunoinformatics team is responsible for the development and maintenance, from project inception through implementation and ongoing support of the EpiVax core systems including (but not limited to) end-user facing websites presenting proprietary applications in the fields of bioinformatics and computational immunology. The ideal candidate will be energized by solving problems in new and innovative ways. You are comfortable working in an ever-changing environment and have the ability to engage with stakeholders to identify minimal viable product for frequent delivery of new technology solutions.

### Responsibilities:

- Develop new applications, support and enhance existing applications using Oracle Application Express, PL/SQL, and other development tools
- Responsible for design, developing, testing, and documenting using Oracle Application Express Software to meet user's needs
- Analyze functional business requirements and develop solution, create technical specifications & unit test scripts
- Partner with fellow IT Resources, and End-users to understand business requirements, minimal viable product requirements, and deliver required features/functions
- Understand existing design/process of applications and data integrations, troubleshoot issues based on requirements. Continuously identify opportunities for application improvements, performance tuning, and resolving root cause issues
- Must have strong problem-solving analytical skills, agile development a plus, excellent troubleshooting, programming, and testing skills.
- In addition, have excellent verbal and written skills specifically in documentation to transform them into detailed system technical design documents with an approach within a technical design documentation

### Basic Qualifications

- Experience working with Oracle's Application Express (APEX) development suite.

### Additional Qualifications and Skills

- BA/BS in Computer Science or equivalent experience in the Information Technology field.
- 1+ years' experience working with Oracle APEX, PL/SQL, stored procedures, web design
- Strong analytical and critical thinking skills to solve complex issues.
- Strong ability to communicate both verbally and in writing with internal and external teams.
- Demonstrated ability in writing technical requirement documentation
- Strong attention to detail, quality troubleshooting, and solution orientation.
